

Any Way

You Cut It...

ISK Protects It.

From fresh-cut lumber and logs to poles, pallets, crates and more, ISK Biocides delivers proven mold and sapstain protection.

Whether it's hardwoods or softwoods, we offer a complete lineup of EPA-registered formulations for consistent and effective mold/sapstain control. All backed by our company's 80 years of experience in wood preservation and exceptional stain and mold prevention.

With ISK Biocides, you'll also enjoy the highest level of personal, face-to-face service from one of the largest, most knowledgeable sales teams in the industry. In fact, whatever your mold or sapstain challenge, we'll help find the ideal treatment solution for your lumberyard or sawmill operations.

Call your ISK Biocides representative today to learn more about our full range of anti-sapstain products and end coatings. And see why ISK Biocides is the clear choice in proven mold and sapstain control.

Proven Mold Control...Powerful Sapstain Protection. Trust **ISK** for Your Wood Solution.

NeXgen®

Delivering high-efficiency sapstain control performance, NeXgen® works to brighten wood while providing proven control of sapstain and mold fungi.

PQ-8®

An outstanding, water-soluble fungicide for controlling mold and sapstain in freshly cut lumber and timber.

End Coatings & Paint

ISK also supplies functional end coatings including Sealite 60 and Sealite 30 for economical control of end checking, as well as CosPaint® ready-to-use end paint.

PQ-80®

Our more highly concentrated formulation of PQ-8, and the only anti-sapstain product approved for food contact, making it an excellent choice for pallet production.

Tuff-Brite®

Delivers an additional "boost" of mold protection for more challenging problems.
